Safety Instructions

Shinobi 7 II is designed to a high standard, but there are some things you should be aware of for your own safety, and that will prolong the life of the device.

Using Shinobi 7 II safely

- Although Shinobi 7 II is very lightweight compared to all the devices it replaces, it is still a solid object that could cause injury if misused.
- Always make sure that your Shinobi 7 II is mounted securely. This is especially important when there are children present who might be tempted to pull on cables.
- Always ensure that cables connected to the Shinobi 7 II are clearly visible and do not present a trip hazard.
- Do not place on uneven or unstable surfaces.
- Do not insert anything other than an SD card into the drive slot on the side of the device.
- Do not obstruct or cover ventilation holes.
- Do not touch the Shinobi 7 II screen with sharp, metallic or abrasive objects.
- Do not expose it to strong electrical or magnetic fields.
- Do not expose it to liquids, rain or moisture.
- Do not dispose of the Shinobi 7 II in municipal waste and do not incinerate it. Always follow local regulations for safe disposal.

Connect and Power-up

Power

The Shinobi 7 II has a single battery slot. To connect a compatible battery, place the battery in front of the retaining lug, align with the connectors and slide the battery into the lock position.

! We recommend using Atomos NP-F series batteries.

The Shinobi 7 II can also be powered via the USB-C PD port via a USB PD power adapter or power bank. Please ensure that your USB PD power source can supply at least 36W of power.

Locking Cable Adapters

The removable HDMI + USB-C locking cable adapters are intended for use with our wide range of locking cables, and are attached via two Philips-head screws.

Once screwed-in, and with your cables securely locked in, you'll have total peace of mind that they'll stay in place throughout your shoot.
